Enerstar America and Nogaleda Energia have incorporated CEME 1

Enerstar America, a SI Capital portfolio company, and Nogaleda Energia, a Chilean family owned Investment Company, announce the incorporation and full funding of CEME 1. CEME 1 is developing a 140 MW hybridized solar project consisting of 70 MW PV capacity and 70MW CSP capacity in the community of Maria Elena in northern Chile. The experienced in-house Enerstar America development team is being supported by a number of international experts (Worley Parsons, Amec Foster Wheeler, Pangea, etc.) to develop a state-of-the-art project in a location with among the highest solar radiations in the world.

- ✓ About Enerstar America: Enerstar America is a subsidiary of Enerstar Solar Thermal Projects, which has successfully developed a 50 MW CSP project in southern Spain. The company is focused on Solar (mostly CSP) developments in Southern and Central America.
- ✓ About Nogaleda Energia: Nogaleda Energia is the renewable project division of a well diversified Chilean Family investment group which holds significant assets in conventional Energy (LNG and natural gas), Fishing, Real Estate and Agribusiness.
